

### **Reference for Prodefinity**

We contacted Kamil and the team at Prodefinity to enquire about a timeslot booking solution for one of our clients, a plastics manufacturing company with multiple sites. Not only was Kamil able to configure their solution to reflect the customer's company website, he set up multiple gates, with different operating hours and different sized timeslots at each. The work was carried out efficiently, tested thoroughly and he kept us informed at every step, reacting to queries and configuration changes quickly and pointing us in the right direction when we carried out our own testing.

I would have no hesitation in recommending Kamil and the team at Prodefinity and would certainly use them again.

Kind Regards
